SP201	As a customer, I need to be able to see the available restaurants where I can select a restaurant and start placing an order.	Create a home page which will be used to show restaurants to the user. The home page should contain a nav bar which contains the Logo where when clicked, it takes the user to the home page. In this navigation bar, have a sign in button so the user can sign in and a sign up button so the user can sign up	Alex and Przemek	Completed	16	Alex	Alex	Completed	---	---	---	---	---	---	---	---	---	---	---	---	---
		Find by Address: underneath the banner, create a section the prompts the user to enter their address and when click on "Find Food", it shows the user restaurants within a ceratin radius of th user	Alex and Przemek	Completed		Przemek	Przemek	---	---	Alex & Przekem	Przekem	---	Alex	Alex & Przemek	Przemek	Completed	---	---	---	---	---
		underneath the find food by address feature, create the main area of the home page which will display all restaurants. There should be a search function which searches for restaurants, food, and food type where it updates the restaurants shown when the clicks on search	Alex and Emanuel	Completed		Emanuel	Emanuel	---	Alex and Emanuel	Alex and Emanuel	Alex	Alex	---	Alex and Emanuel	Completed	---	---	---	---	---	---
		Access the database table which stores the restaurants information, and make it display the restaurants image, the name, the type of food and the description of the restaurant. The restuarants should be populated in the main area of the home page. SP202	A a Restaurant I need to be able to see information about how my restaurant is doing on the app. I should be able to see information such as: the number of orders, my revenue, my average rating. Furthermore I should be able to add categories and food/drink to my menu.	Create a home page for the restaurant side, which displays the restaurants number of oders for the day, their revenue for the day, their menu management and their average rating. Set each value to 0 as default.	Samy and Eduard	Completed	16	Samy	Samy	Samy and Eduard	Samy	Completed	---	---	---	---	---	---	---	---	---	---	---
		Create a menu section for the restaurant which gives the restaurant owner the ability to add products and categories to their menu. Under each category created. The restaurant can add products. This includes: Uploading a picture, give it a name, set a description, enter the ingredients, give it a price, and enter the number of calories. further more, they have the opportunity to add, another item, edit or delete the item or the category.
