# Daily Standup Meeting

Project Name: EatMeOut	Group Name: SEEPP Solutions	
Sprint Number: 5	Date and Time: 07/03/2025 9:30am	

## **List of attendance:**

•	Name:	Przemek Wasinski	Attended? YES
•	Name:	Samy Wanas	Attended? YES
•	Name:	Alex-Petrisor Bejenaru	Attended? YES
•	Name:	Emanuel Vochitoiu	Attended? YES
•	Name:	Edwart Lanovici	Attended? YES

## **Project Progress:**

## Team Member (1): Przemek Wasinski:

1. What did you accomplish yesterday?

Answer: Created search functionality for users to find restaurants with ease.

2. What will you do today?

Answer: Allow users to favourite restaurants

3. What obstacles are impeding your progress?

Answer: Making sure user's device can handle the application even with a slow internet connection.

## Team Member (2): Samy Wanas:

1. What did you accomplish yesterday?

Answer: Created restaurant pages to allow users to view the items a restaurant is offering

2. What will you do today?

Answer: Create a basket and checkout system

3. What obstacles are impeding your progress?

Answer: Making the application perform well no matter how powerful the user's device is.

#### Team Member (3): Alex-Petrisor Bejenaru:

1. What did you accomplish yesterday?

Answer: Organised meeting time and informed all team members, adjusted meeting time to suit all team members and improved frontend.

2. What will you do today?

Answer: Monitor the progress of our developers and help them reach their goals.

3. What obstacles are impeding your progress?

Answer: Finding free time for meetings that fit in everyone's schedule

## Team Member (4): Emanuel Vochitoiu:

1. What did you accomplish yesterday?

Answer: Looked over and made sure developers are not falling behind

2. What will you do today?

Answer: Monitor the progress of our developers and help them reach their goals.

3. What obstacles are impeding your progress?

Answer: A big learning curve for all members.

## Team Member (5): Edwart Lanovici:

1. What did you accomplish yesterday?

Answer: Vigorously tested the home page features to ensure errors do not disrupt the functionality of the application

2. What will you do today?

Answer: Create mock tests that I can use when the application is more feature rich.

3. What obstacles are impeding your progress?

Answer: Learning new testing methods
